

## Course Outline

---

### 20345-1: Administering Microsoft Exchange Server 2016

**Duration:** 5 days (30 hours)

#### Target Audience:

This course is primarily intended for people aspiring to become enterprise-level messaging administrators for Exchange Server 2016. IT generalists and help-desk professionals who want to learn about Exchange Server 2016 might also take this course. Students taking this course are expected to have at least two years of experience working in the IT field—typically in the areas of Windows Server administration, network administration, help desk, or system administration. They are not expected to have experience with previous Exchange Server versions.

The secondary audience for this course includes IT professionals who take this course as preparation material for exam 70-345: Designing and Deploying Microsoft Exchange Server 2016, or as part of the requirement for the MCSE: Microsoft Exchange Server 2016 certification.

#### Prerequisites:

Before attending this course, students must have:

- A minimum two years of experience administering Windows Server, including Windows Server 2012 R2 or Windows Server 2016.
- A minimum two years' experience working with active Directory Domain Services (AD DS). A minimum two years of experience working with name resolution including Domain Name System (DNS).
- Understanding of TCP/IP and networking concepts.
- Understanding of Windows Server 2012 R2 or later, and AD DS, including planning, designing, and deploying.
- Understanding of security concepts such as authentication and authorization.
- Understanding of Simple Mail Transfer Protocol (SMTP).
- Working knowledge of public key infrastructure (PKI) technologies, including Active Directory Certificate Services (AD CS).

#### Topics Covered:

- Module 1: Deploying Microsoft Exchange Server 2016
  - Overview of Exchange Server 2016
  - Requirements and deployment options for Exchange Server 2016
    - Lab : Deploying Microsoft Exchange Server 2016
      - Evaluating requirements and prerequisites for an Exchange Server 2016 installation
      - Deploying Exchange Server 2016

After completing this module, students will be able to:

- Describe the features and functionality of Exchange Server 2016.
- Describe the requirements and deployment options for Exchange Server 2016.

- Module 2: Managing Microsoft Exchange Server 2016 servers
  - Exchange Server 2016 management
  - Overview of the Exchange 2016 Mailbox server
  - Configuring Mailbox servers
    - Lab : Configuring Mailbox servers
      - Creating and configuring mailbox databases

After completing this module, students will be able to:

  - Describe Microsoft Exchange Server 2016 management.
  - Describe the Exchange Server 2016 Mailbox server role.
  - Configure mailbox servers
- Module 3: Managing recipient objects
  - Exchange Server 2016 recipients
  - Managing Exchange Server recipients
  - Configuring address lists and policies
    - Lab : Managing Exchange Server recipients and public folders
      - Managing recipients
      - Managing public folder mailboxes
    - Lab : Managing Exchange Server email address lists and policies
      - Managing email-address policies
      - Managing address lists and address book policies

After completing this module, students will be able to:

  - Describe the different Microsoft Exchange Server 2016 recipients.
  - Manage Exchange Server 2016 recipients.
  - Configure address lists and policies.
- Module 4: Managing Microsoft Exchange Server 2016 and recipient objects by using Exchange Management Shell
  - Overview of the Exchange Management Shell
  - Managing Exchange Server 2016 by using Exchange Management Shell
  - Managing Exchange Server 2016 by using Exchange Management Shell scripts
    - Lab : Managing Exchange Server and recipient objects by using Exchange Management Shell
      - Using Exchange Management Shell to manage recipients
      - Using Exchange Management Shell to manage Exchange Server

After completing this module, students will be able to:

  - Explain the Exchange Management Shell cmdlets that you can use to configure and manage Microsoft Exchange Server 2016.
  - Manage Exchange Server and recipient objects by using the Exchange Management Shell.
  - Manage Exchange Server and recipient objects by using the Exchange Management Shell scripts.
- Module 5: Implementing client connectivity
  - Configuring client access services in Exchange Server 2016
  - Managing client services
  - Client connectivity and publishing of Exchange Server 2016 services
  - Configuring Outlook on the web
  - Configuring mobile messaging on Exchange Server 2016
    - Lab : Deploying and configuring client access services on Exchange Server 2016

- Configuring certificates for client access
- Configuring client access options
- Configuring custom MailTips
- Lab : Deploying and configuring client access services on Exchange Server
  - Configuring Exchange Server 2016 for Outlook
  - Configuring Outlook on the web
  - Configuring Microsoft Exchange ActiveSync

After completing this module, students will be able to:

- Configure client access services in Microsoft Exchange Server 2016.
- Manage client services.
- Describe client connectivity and publishing of Exchange Server 2016 services.
- Configure Microsoft Outlook on the web.
- Configure mobile messaging on Exchange Server 2016.

➤ Module 6: Managing high availability in Exchange Server 2016

- High availability on Exchange Server 2016
- Configuring highly available mailbox databases
- Configuring high availability of Client Access services.
  - Lab : Implementing DAGs
    - Creating and configuring a database availability group
  - Lab : Implementing and testing high availability
    - Deploying a high availability solution for client access services
    - Testing the high availability configuration

After completing this module, students will be able to:

- Describe the high availability options in Exchange Server 2016.
- Configure highly available mailbox databases.
- Configure highly available client access services.

➤ Module 7: Implementing disaster recovery for Microsoft Exchange Server 2016

- Implementing Exchange Server 2016 backup
- Implementing Exchange Server 2016 recovery
  - Lab : Backing up Exchange Server 2016
    - Backing up Exchange Server 2016
  - Lab : Implementing disaster recovery for Exchange Server 2016
    - Restoring Exchange Server 2016 data
    - Restore an Exchange Server DAG member (optional)

After completing this module, students will be able to:

- Explain how to implement Microsoft Exchange Server 2016 backup.
- Explain how to implement Exchange Server 2016 recovery.

➤ Module 8: Configuring and managing message transport

- Overview of message transport
- Configuring message transport
- Managing transport rules
  - Lab : Configuring message transport
    - Configuring message transport
    - Troubleshooting message delivery
    - Configuring a disclaimer transport rule
    - Configuring a DLP policy for financial data

After completing this module, students will be able to:

- Describe message transport.
- Configure message transport.
- Manage transport rules.

➤ Module 9: Configuring antivirus, antispam, and malware protection

- Deploying and managing an Edge Transport server for message security
- Implementing an antivirus solution for Exchange Server 2016
- Implementing an antispam solution for Exchange Server 2016
- Lab : Configuring message security
  - Configuring and testing EdgeSync
  - Configuring antivirus, antispam, and malware protection features on Exchange Server 2016

After completing this module, students will be able to:

- Deploy and manage an Edge Transport server role for message security.
- Implement an antivirus solution for Microsoft Exchange Server 2016.
- Implement an antispam solution for Exchange Server 2016.

➤ Module 10: Implementing and managing Microsoft Exchange Online deployments

- Overview of Exchange Online and Office 365
- Managing Exchange Online
- Implementing the migration to Exchange Online
- Lab : Managing Exchange Online
  - Managing Exchange Online

After completing this module, students will be able to:

- Provide an overview of Exchange Online and Office 365.
- Manage Exchange Online.
- Implement a migration to Exchange Online.

➤ Module 11: Monitoring and troubleshooting Microsoft Exchange Server 2016

- Monitoring Exchange Server 2016
- Troubleshooting Exchange Server 2016
- Lab : Monitoring and troubleshooting Exchange Server 2016
  - Monitoring Exchange Server
  - Troubleshooting database availability
  - Troubleshooting client access services

After completing this module, students will be able to:

- Monitor Exchange Server 2016.
- Troubleshoot Exchange Server 2016.

➤ Module 12: Securing and maintaining Exchange Server 2016

- Securing Exchange Server with role-based access control (RBAC)
- Configuring audit logging on Exchange Server 2016
- Maintaining Exchange Server 2016
- Lab : Securing and maintaining Exchange Server 2016
  - Configuring Exchange Server permissions
  - Configuring audit logging
  - Maintaining updates on Exchange Server 2016.

After completing this module, students will be able to:

- Configure RBAC on Microsoft Exchange Server 2016.
- Configure options related to user and administrator audit logging.
- Maintain and update Exchange Server 2016.
